## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 6-12 and 14-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Grundy.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grundy in view of Norton. Grundy discloses the claimed invention except for the plate having apertures. Norton teaches that it is known to provide an airflow cabinet with an apertured top plate as set forth at column 2, line 61. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the cabinet of Grundy with a plate having apertures there through, as taught by Norton in order to provide laminar flow.
5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grundy. Grundy discloses a filter at 68 and 82. Mere selection of a known filter to substitute for

Art Unit: 3749

a filter prior to the invention, the selection of the filter being on the basis of suitability for the intended use, would be entirely obvious.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grundy in view of Becke. Grundy discloses a door which seals the opening. To substitute the well known refrigerator type magnetic seal in Becke for the seal of Grundy would be obvious.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

#### ***Claim Objections***

8. Claims 10 and 14 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 10 and 14 recite no structure.

#### ***Claim Rejections - 35 USC § 112***

9. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 7 is misdescriptive.
